Did you know we have lots of great games and can't always afford to give them away? When you help Guardian Play Games fund new games, you help us keep the lights on and the whimsy fluffing flowing, and in so doing, make the world of Telltale a better place. We have lots of games we never get to tell you about because we've spent our limited funds on the very sort of small games you've helped fund through Guardian Play Games. So, if you'd like to see more, just say a quick hoorah for the Guardian and choose "Yes" to the following prompt: If you enjoy our work and want to support it, tell your friends about us. You'll find yourself earning gifts as you go, without any action on your part other than playing games we make. Thanks! Devovx 2013 - Jax "Symphony" is our first Android

app. It's the first in the series of apps that explore the underlying concept of The Light -- visionaries helping to bring the light back to what was once a dark and dying world. Go check it out! Today we're excited to release the world premiere of Symphony of The Light to you, thanks to our friends at SXSW. If you've been to SXSW, you know we've been hard at work at the festival. This year we had a booth (booth 2101!) and our very first app was based on our brand new series The Light, which we debuted at our tabletop session. We're very excited for this technology to reach a much broader audience than our 500+ attendees! We also debuted the Symphony of the Light, a version of our first app that uses (almost) no device power, relying solely on the audience's devices to do all the processing and visual magic, d41b202975

DeveloperFeatures! I've been waiting to see if this game will come to the PC and it's even better than I hoped. 5/5 Timothy Game "There the Light" I'm giving this game an overall 5/5 because I feel like the game is very funny and I got a lot of laughs from it, and it tells a pretty good story about the world and its history and how things happen and what's gonna happen in the future. 5/5 Yina Game "There the Light" DeveloperReviewsWe have noticed that the Quarles Site has had a few inactive users and we could use your help getting everyone back online! To get everyone back online, we need a minimum of 30 positive comments - we will then add you back to the site. DeveloperReviews" There the Light" is amazing game! DeveloperReviews" There The Light" by Durka Entertainment is something really different! It is pretty different from the rest of them, though. The style is something new and innovative and the emotions that you will feel while playing this story will be very different, in a really good way. The gameplay is something really cool that you will not ever get tired of! It will not get boring. At all. DeveloperReviews" There the Light" is really interesting. We can all relate to our parents or teachers or even our loved ones sometimes. In "There the Light" you will find a way to make your journey as a gamer to the next level. And you will have the chance to change your perception of video games. This game will make you think and it will have you smiling while playing it. That alone is what makes it so great! We were blown away by the story, the animations, the voice acting and the music, oh and the music! It is beautiful! DeveloperReviewsMy son and I are big fan of video games. One of my favorite games is "Dance Central", and I always play the game and everything. I think that everyone should take a look at this game and tell us if this game is one of the best they have played. I am pretty sure that everyone will enjoy this game. It's not a game that I would not recommend to anyone, and I think that everyone should play it. It's also a game that my son and I find interesting. This game is no longer in stores. Thank you. 5/5 Joaquin Crispin Lopez Review "There the Light"

Count "Here The Light" keyword to be 3 in

Q: how do i get it? A: I don't like how you're handling the attributes by putting everything up in the array, but this should get you what you're looking for. Or you could extract the tags also, and give them individual positions like { here the light, here the light } \$dom = new XmlDocument(); \$dom->loadHTML(\$text); \$dom->preserveWhiteSpace = false; \$dom->formatOutput = true; \$dom->recover = true; \$xpath = new XPath(\$dom); \$xpath->registerNamespace('nsu', ''); \$keyword = \$xpath->query("//nsu:*[@indexname = 'keyword']"); if (\$keyword->length == 1) { \$keyword = \$keyword->item(0); \$keywordAttributes = \$keyword->attributes; \$keywords = explode(',', \$keywordAttributes->getNamedItem('value')->nodeValue); foreach (\$keywords as &\$keyword) { if (\$keyword === 'Here the light') { \$count = '3';
