Roblox is an online game platform and game creation system designed for the Web. The platform was founded in April 2004 by David Baszucki and Erik Cassel. It was first launched as a toy for children, but quickly expanded its goals to include a community and creative platform with game-development tools. Roblox is used to create an interface to a database. The database allows the programmer to create games and objects, such as characters and places, and the data in the database is stored as blocks of Lua code. The programming interface contains a Lua interpreter and a script file compiler that converts scripts from the programming language Lua into C++. The user interface itself is also created with Lua. After Roblox was released, it quickly became a multiplayer platform for children, with many clones and imitations that created new versions of games, including many content-rich versions for adults. When Roblox began to grow rapidly in the second half of the 2010s, its developer team had trouble keeping up with the demand. Roblox is now supported by more than 166,000 software developers, and has more than 165 million monthly active users, including more than half of all American children under 16. Created by David

Baszucki and Erik Cassel in 2004, Roblox, Inc. is a privately held company based in San Francisco, California, USA. Roblox has received venture capital investment from Benchmark Capital and Founders Fund. As of March 2015, the company's largest investors were Hearst Corporation, Flagship Investments, Groupe Bull, and Codebridge. The company is privately held. As of March 2015, Roblox was projected to earn $40 to $50 million in revenue for that year. Release date: 3rd April 2004 Current status: Active Update Frequency: New Features added and Bug Fixes Creation date: 2004 Platforms: Windows, Mac OS, iOS, Android Role: Platform The information contained on this page is considered accurate as of the date of publication.
